Education

2025 BFA, Photography, Point Park University, Pittsburgh, PA

Software Design and Development

2026-Present **Folio**, open-source Android launcher for foldable screens (Kotlin, Jetpack Compose; min SDK 31, target SDK 36), McCal Media. Adaptive layouts across folded, unfolded and tablet screens; package format and in-app Market; Home startup reduced from 899 ms to about 120 ms.

2026-Present **Keyd**, companion Android keyboard for Folio, McCal Media.

2026-Present **TerraNova**, offline node-graph design studio for Hytale world generation (Tauri, TypeScript, Rust), open source under LGPL-2.1, alpha releases.

2026-Present **Abridgd**, local-news reader (prototype, paused), McCal Media.

2026 **Folio Community Tweaks** and a source template: signed packages of tweaks, themes and layouts that Folio installs from a Market, built in Python and served from GitHub Pages.

2026 **TerraNova Lab**, online top-down visualizer for Hytale world-generation density graphs (TypeScript), companion to TerraNova.

2026 **Void Ledger**, local-first Warframe Baro Ki'Teer planning app for Windows (TypeScript).

2026 Client websites for Divine Eyth (with a TinaCMS dashboard) and the Allegheny HYP Club (React, TypeScript, Vite).

2024-Present Freelance website and portfolio development (TypeScript, React, Vercel), including manifest-driven content and responsive image delivery.
